Agriculture export regulatory services

Fees and charges from 1 July 2026

The [Australian Government Cost Recovery Policy](#) requires regulators to recover some or all of the efficient costs of delivering their services, unless the government has decided to fund the activity.

We have developed an ongoing sustainable funding model to support the delivery of export regulatory services to Australia's agricultural sector. The new modelling of fees and charges reflects the government's decision to return to full cost recovery and to transition 5 existing activities and one new activity into export cost recovery arrangements. It also reflects the government's further decision to defer the phased transition to full cost recovery by 12 months, with the intention of returning export cost recovery arrangements to full cost recovery by 2029–30.

This fact sheet sets out the fees and levy-based charges applying in 2026–27, which are unchanged from 2025–26. It also provides an overview of the proposed changes to fees and levy-based charges from 1 July 2027 and over the following 2 financial years.

More information is available in each of the [2026–27 Agricultural Exports Cost Recovery Implementation Statements \(CRIS\)](#).

For information about the application of regulatory fees and charges, email costrecovery@aff.gov.au.

Legal basis for changes

The prices have been updated in the relevant legislative instruments:

- [Export Control \(Fees and Payments\) Rules 2021](#)
- [Export Charges \(Imposition – General\) Regulations 2021](#)
- [Export Charges \(Imposition – Customs\) Regulations 2021](#)

Industry consultation

We regularly engage with industry on charging arrangements.

Although prices remain unchanged for 2026–27, the prices proposed from 1 July 2027 align with those communicated to industry during consultation on the 2026–27 exports CRIS between January and March 2026. During this process, the department released 7 CRISs for public consultation and invited stakeholder feedback through submissions and meetings with key industry bodies. A summary of feedback is included in each CRIS.

We are committed to transparent, meaningful consultation and careful consideration of stakeholder feedback on an ongoing basis.

Overview of price points as at 1 July 2026

The 2026–27 fees and levy-based charges align with legislated prices and remain unchanged from 2025–26, except for a reduction in the tonnage charge for grain. An overview of the fees and levy-based charges for each arrangement is provided in the tables at [Appendix A](#):

- Dairy exports are summarised in Table A1
- Fish and egg exports are summarised in Table A2
- Grain and plant products exports are summarised in Table A3
- Horticulture exports are summarised in Table A4
- Live animal exports are summarised in Table A5
- Meat exports are summarised in Table A6
- Non-prescribed goods exports are summarised in Table A7.
